**ENGLISH**

## Be confident.

Our business environment has always been uncertain and ever-changing. Yet, the speed, intensity, and impact of these changes have increased dramatically over the last few years.

In such challenging times, there are two possible ways to respond. Either you take shelter and wait for the storm to blow over or you can, despite everything, keep planning and keep looking for growth.

To do so, you need a solid dose of confidence. You need to genuinely believe that you are able to cope with all the challenges the future brings. Such confidence can't be bought. But you can grow it. By being well-supported and surrounded by the right people.

For our customers and partners, Picanol wants to be that partner who provides outstanding support. By offering you every opportunity to shape your future with confidence, whatever challenge comes your way.

And with the new Ultimax Terry rapier machine, Picanol is clearly proving its confidence in the future. More than 85 years of experience in building weaving machines has given us the solid basis to completely rethink the current concepts.

Today, our entire team is very proud and confident to reveal the Ultimax Terry. And we are happy and eager to share this feeling of optimism and confidence with you. It makes us smile, and we're sure it will make you smile too.

Because we are truly convinced that the all-new and revolutionary Ultimax Terry will give you the necessary confidence to cope with any future challenges.

Let's grow together.

**They say smiling is contagious.**

# Ultimax Terry

## Are you ready for the ultimate weaving experience?

When designing the new Ultimax Terry rapier machine, we focused on the following three aspects:

- **Ultimate performance** and **high-quality output**
- Readiness for the **sustainability requirements** of tomorrow
- The greatest ease of use, thanks to a **maximum level of digitization**, based on fully integrated sensors in almost every part of the machine

This means that Ultimax Terry is - more than ever - a machine developed by design with our four design principles in mind: **Sustainability Inside**, **Driven by Data**, **Smart Performance**, and **Intuitive Control**. Thanks to the high level of digitization and enabled by our digital platform **PicConnect**, the monitoring of both individual machines, as well as the entire weaving mill, will become much easier than before and will give you **unprecedented control**.

To realize this groundbreaking weaving machine, both our experienced engineers and a new generation of young engineers came together to mix fresh ideas with years of experience. And armed with the latest design techniques, they critically examined and questioned each and every element of the machine.

The result is a focused and **razor-sharp machine**, that is ready to go with **audacious speed**, **precisely reacting** to your slightest touch or setting, and faultlessly bringing you **top-quality output** - both now and in the future.

Even our classic exterior design has been **radically disrupted** to make it clear from the outside how cutting edge the Ultimax Terry is on the inside.

We can truly state that Ultimax Terry is a **revolutionary rapier platform**, based on which we and our customers will be able to cope with the many challenges ahead when it comes to sustainability, digitization, and obviously also realizing **maximum performance with minimum use of resources**.

The future may be uncertain and changing. But with Picanol and our new Ultimax Terry by your side, you can confidently cope with any future challenge.

Experience the all-new, revolutionary Ultimax. Scan this picture with our app and watch the video.

**Radical ease of use**

**Disruptive design**

**Faultless precision**

**Unprecedented sensorization**

**Uncompromised speed**

**Maximum reliability**

**Future-proof sustainability**

**Ultimate performance**

# Our design principles: how we build our machines.

Today's world is all about connectivity, user-centric design, intuitive controls, self-learning capacities, and sustainability...to name just a few. When designing a new machine, we take these ever-evolving requirements as benchmarks for all our innovations and improvements.

That's why Smart Performance, Sustainability Inside, Driven by Data, and Intuitive Control have become the basic principles of any Picanol weaving machine. Together, they enable you to follow your weaving instincts and get the best possible results on all our platforms.

## Smart Performance

Performance is the first requirement for any machine or feature. The obvious indicator for this is the theoretical maximum speed. Very often, however, the gap between this theoretical speed and the effective speed under real-life conditions is huge.

That's why we design our machines around the principle of Smart Performance: **intelligent machine design** combined with self-setting software, which enables **the highest possible practical speed** and **best performance under all conditions**.

## Sustainability Inside

When it comes to preventing waste and reducing energy consumption, for many years Picanol has faced up to its responsibilities. Our machines are designed with a built-in capacity for sustainability: **energy efficiency** and **smart use of resources** are at the heart of all our platforms.

## Driven by Data

**Digitization** has become increasingly important over the last few decades and this will continue to be the case. All kinds of machine and contextual data have to be captured and made available for **artificial intelligence**, making production more efficient. Thanks to our **fully integrated sensorization** and enabled by our digital platform **PicConnect**, we are at the forefront of digitization, offering you the smartest way to manage your weaving machines.

## Intuitive Control

Children nowadays handle new technology **effortlessly and intuitively**. And that's what we want for our machines as well. Just like with your smartphone or in your car, **the interactive machine display** is the interface that controls almost all the machine functions. This **user-centric approach** is also embedded in the design of the overall machine, making all operations easy, intuitive, and self-explanatory.

## Are you ready for the era of intuitive weaving?

Read all about PicConnect at

learn more about  
their possibilities.

### Stable pile formation, even at the highest speeds

Thanks to the unique **pile motor set-up** directly driving the cloth and backrest movement simultaneously, **accurate pile formation** is assured at highest speeds.

### Optimum loop formation regardless of fabric design

The rigid yet extremely light construction ensures a highly dynamic behaviour, **guaranteeing perfect loop formation** for the most complicated terry designs, be it very light towels or heavy bathmats. This is by far the best pile compensation system ever!

## Smart Performance

### Weave all kinds of weft yarn with ease

From **detection of the filling yarn** to the unique **QuickStep weft presenter** with **On-loom Picascope** and the various **weft cutter systems**, everything is designed to handle the **widest variety of weft yarns** in the smoothest possible way.

### Robust structure and optimal shed geometry - the solid basis for performance

The completely new loom structure relies on the proven Picanol concept combining **two solid side frames** that are connected by **large-section cross rails**. The sley is driven by conjugated cams located under the fabric line to guarantee equal beat-up force over the full width.

### Maximum performance for each fabric

If you are looking for **highest speed combined with ultimate versatility** the **GCv gripper system** is the answer to your needs.

### New take-up concept, your guarantee for top fabric quality

In line with the robust structure of the design, the **OptiForce take-up** ensures optimum fabric uniformity and quality.

### Highest speeds assured, also in the long run

Integrated sensors guarantee the **lubrication** and monitor the **temperature** of the cooling blocks of the **gripper tape**. The lifetime of the components is ensured thanks to the suggested interventions.

### Designed to weave recycled yarns

The machine has been developed for the increasing use of **recycled yarns** in weaving. You can be confident regarding the shift toward recycled yarn that is taking place.

### Minimize your right-hand side weft waste

Improved control of weft length is assured by the positive opening of the right-hand side gripper with the **ERGO (Electronic Right Gripper Opener)**. ERGO allows individual setting through the display of the gripper opening timing for each weft channel.

### The data you need to optimize your climatization

Every Picanol machine has an **integrated temperature and humidity sensor**. The data is available on the BlueTouch display or can be consulted through PicConnect to minimize the energy use for your weaving room conditions.

### The most energy-efficient main drive on the market

The redesigned **SUMO** drive concept pioneered by Picanol is the most energy-efficient main drive on the market. It ensures the **lowest possible energy consumption** while simultaneously offering many other advantages such as full-range speed control, slow motion, pick finding, and even **automatic crossing setting**. The new integrated **temperature sensor** completes the redesign.

## Sustainability Inside

### Monitor the power consumption in real-time

**Power monitoring** keeps track of the electrical consumption on a continuous basis. The data can be consulted on the display at any time.

### Smart energy use thanks to efficient lubrication and improved temperature management

As well as **filtering and cooling the oil**, the integrated lubrication system brings the **optimum amount of oil** to all the crucial points in the machine. This not only **extends the lifetime** of the components but also assures the **lowest possible energy consumption**.

Furthermore, the unique **water cooling** system will reduce the load on your climatization to the absolute minimum.

### No design limitations

The **pile height-changing** device makes it possible not only to change the group beat-up rate but also **to weave structures** such as waves. All set on the display!

### The highest level of digitization

The **15.6" BlueTouch display** is the perfect tool for both handling and visualizing your data. This is clearly illustrated with examples such as the **Sensor dashboard** and the **Action center with Logbook** functionality.

### You keep control of every step of the insertion

The insertion parameters are digitally controlled and managed on the BlueTouch display.

### All sensor data at a glance

Essential sensor data is **easily accessible** and can be visualized on a dedicated dashboard on the **BlueTouch display**.

## Driven by Data

### Artificial Intelligence in your weaving mill

**PicConnect** is the gateway to all of **Picanol's digital services**, from industrial IoT to service-related applications. PicConnect-enabled means that the machine is ready to fully leverage the various PicConnect applications.

### The reliable electronic platform, ready for Industry 4.0

The **BlueBox electronic platform** enables **improved data handling**. In combination with the well-known reliability, this sets the benchmark for electronic platforms in the market.

### Enjoy operating the machine

In addition to the various **user-friendly features** that are standard on all Picanol machines, handling the machine is made even easier thanks to a **range of innovative design features**.

### Clear visibility of the machine status

The light combination of the **LED signal torch** and the LED strip on the **push buttons** is **synchronized**. In addition, it can be fully **customized** by the user.

### Full and quick data control at your fingertips

The advanced **15.6" BlueTouch display** allows **quick access** and **control of all settings**. With features such as Access control, help functionality, and others, the BlueTouch display sets new standards in the market.

### Fine-tuning and width changes have never been easier

Picanol is now bringing the ease of finetuning to the next level with the new and unique **On-loom Picascope**. Furthermore, all components involved in a width change are mounted on a **single support**. A **display procedure** that can be combined with the **Gripper stroke measurement** reduces the time required for changing the width to the absolute minimum.

### Total control of access to your machines

**Access control** manages the access level of the different users and allows you to define personal screens.

### On Picanol machines only! All shed information is available at the snap of your fingers

The **settings of the shed** can now be done in the most intuitive way thanks to the **visualization** of the shed on the BlueTouch display.

### Intuitive Control

## Technical specifications

\* patented  
\*\* patent pending

Fabric specifications			
Useful widths	230, 240, 260, 280, 300, 340 and 360		
Width reduction	Up to 100 cm depending on reed width		
Yarn range	Spun yarns	Nm 200 - Nm 3	Ne 118 - Ne 1.8
	Filament yarns	20 den - 3,000 den	22 dtex - 3,300 dtex

Connect packages				
		Standard	Optional	Aftermarket
Monitor package		-	•	•
	Access control	-	-	-
	OptiStyle	-	-	-
	Raw material use	-	-	-
	AutoSens filling detector	-	-	-
	Gripper tape monitoring	-	-	-

Pile formation				
Direct driven cloth formation for up to 15 mm pile height		•	-	-
Pile monitoring		-	•	•

Filling insertion				
Filling selection	Up to 8 colors or yarn types	•	-	•
Grippers	GC - Guided Gripper	•	-	•
On-loom Picascope **		-	•	•
Gripper stroke measurement **		•	-	-
Prewinder & options	PSO - Prewinder Switch-Off	-	•	•
	Pneumatic feeder threading up	-	•	-
	TED - Tension Display	-	•	•
Active filling brakes	TEC - Programmable Filling Tensioner	-	•	•
	EFT - Electronic Filling Tensioner *	-	•	•
Filling detector	Piezo-electric filling detector with anti-2 protection	•	-	•
	SmartEye filling detector	-	•	•
Filling cutter	EDC - Electronic Disc Cutter	•	-	•
	Mechanical filling cutter	-	•	•
	SmartCut filling cutter	-	•	•
Gripper opener	ERGO - Electronic Right-hand Gripper Opener *	-	•	•

Warp let-off				
Let-off system	ELO - Electronically controlled Let-Off	•	-	•
Warp beam	Ground diameter 805 mm - 1,000 mm	•	-	•
	Pile diameter 805 mm - 1,000 mm - 1,100 mm - 1,250 mm	•	-	•
Backrest	Double backrest rollers	•	-	•
	TSF - warp tension sensor in the feeler	•	-	•
	Pneumatic pile backrest ** with TCLS	•	-	•
	- pile tension compensator with leaf spring	-	-	-
Electrical warp	2 contact bars 30 mm pitch	•	-	•
stop motion	4 contact bars 16 mm pitch	-	•	•
	Zone detection LHS / RHS	•	-	-

			Standard	Optional	Aftermarket
Cloth take-up					
Take-up system	ETU - Electronically controlled Take-Up		•	-	•
Cloth take-up	Diameter of cloth roll: 600 mm		•	-	-
	PBM - Picanol Batching Motion (up to diameter 1,500 mm)		-	•	-
Needle roll			•	-	•
	Needle roll control		-	•	•
Pile directing plate			-	•	•
Fabric illumination	LED illumination	above reed	-	•	•
		above back shed	-	•	•

Machine drive and control					
Main control	BlueBox electronic platform		•	-	-
Main motor	SUMO main motor with direct machine drive		•	-	•
	OptiSpeed (automatic stepless speed variation)		•	-	-
	Automatic full pickfinding *		•	-	-
Sley motion	Positive conjugated cam units (2 or 3, depending on machine width)		•	-	-
Shedding motion			•	-	-
	Positive dobby (R) for 20 harness frames, with levelling		-	•	•
	Execution for electronic jacquard (J)		-	•	•
	AKM - electronic setting of the crossing moment		•	-	-
Lubrication	Centralized lubrication, forced circulation of filtered oil to all major drive functions		•	-	-
Cooling system	Oil-air heat exchanger		-	•	•
	Oil-water heat exchanger		-	•	•
Power monitoring			-	•	•
Interactive display	15.6" BlueTouch display		•	-	•
Smart signal lights	Pushbuttons on front panel with integrated signal lights **(design) LED signal torch **		•	-	•
			•	-	•

Harness frames					
Driving element	Harness drive DRC30		•	-	-
Harness frames	For 11", 13" or 15" heddles	standard	•	-	•

Selvedge formation					
Selvedge systems	ELSY	LHS / center / RHS	-	•	•
		- independent electronically controlled selvedge system			
Selvedge cutters	Electronic cutter	LHS / RHS	•	-	•
		center	-	•	•
		Adaptive cutter	-	•	•
Temples	Cylinder temples		•	-	•

# Built in the factory of the future

## Training is part of the deal Picanol makes with its customers

Well-trained employees are a real asset to your company. Skilled staff make your machines run at optimum performance, producing excellent fabric quality and resulting in superb plant efficiency.

We feel it is our duty to help your employees to improve their skills and knowledge. Hence, in 2015 we decided to invest in a state-of-the-art Technical Training Center in Ypres.

Three fully equipped rooms (each with weaving machines, cut models, mini workshop etc.) cover a total area of 270 m<sup>2</sup>. This new knowledge center allows Picanol to train technicians from customers around the world in optimal conditions.

All facilities are there to give your employees a warm welcome. If your employees are not able to travel to one of our training centers, our instructors come to you and will organize training at your premises.

## Spare Parts & Weave-Up

Weaving machines are one of your most important investments. Keeping them in optimal condition is essential to safeguard the high value of this asset and to remain competitive as a weaver in a globalizing world.

Use of original Picanol parts guarantees a continued high performance of the Picanol weaving machines.

Moreover, timely replacement of original parts enables Picanol's customers to run their machines in the most economical way.

Regardless of the age of the machine, the use of original parts will keep the machine in top condition which has a positive influence on the value of the machine throughout its life time.

Furthermore, to expand your weaving range and/or increase your machine performance, Picanol offers upgrade packages for installed Picanol machines. Weave-Up upgrades add state-of-the-art technology to your machines, which apart from the benefits in weaving equally increase the value of your investment.

Scan the pictures of the features in this brochure with the Picanol app and learn more about their possibilities.

# Curious about our upcoming news?

Download our new app on your mobile phone or tablet and thanks to the news notifications feature you will be the first to know about all our innovations. This app is updated frequently so keep an eye out for new arrivals and updates.

You can also subscribe to our **newsletter** at [www.picanol.be/newsletter](http://www.picanol.be/newsletter) to be the first to learn about our latest news, updates and events.

## Book your training course

As already mentioned, training is part of the deal Picanol makes with its customers.

A full list of our training courses can be found on our **website**: [www.picanol.be/training-services](http://www.picanol.be/training-services).

For more information, please contact your local Picanol agent or Customer Service Representative (CSR). See [www.picanol.be/agents](http://www.picanol.be/agents) for contact details.

## We make it easier

Our calculators, freshly designed. Developed to make the everyday lives of weavers easier.

Visit our website [www.picanol.be](http://www.picanol.be) and discover our new integrated weaving calculators online or download the app with the calculators.

## Meet us around the world

During the year, Picanol is present at events and trade fairs around the world. Thanks to the "Trade Fair" function on our app, **you can prepare for your visit**.

With the Picanol app you can discover the machines and the features on show at the main trade fairs, in preparation for your visit. Download the app at [www.picanol.app](http://www.picanol.app).

Download the app at: [www.picanol.app](http://www.picanol.app) or scan this QR code.

# About Picanol

For more than eighty years, Picanol has played a pioneering role in the global textile industry and it is currently the world's leading weaving machine manufacturer. Picanol develops, manufactures, and sells high-tech weaving machines based on airjet and rapier technology. Picanol offers upgrade kits, spare parts, training, troubleshooting services, and also digital services for its weaving machines through the PicConnect platform. Picanol has its headquarters in Ieper (Belgium) and it employs more than 1,200 people worldwide. Picanol is part of Picanol Group, a business unit of Tessenderlo Group (Euronext: TESB).
