

Blue prewinders

Introduction

The Blue prewinders represent the next generation of prewinders for airjet weaving machines offering a huge increase in user-friendliness and stability. They are available in two executions: Blue22 is the closed windings execution & the successor of the 2231 prewinder whereas Blue11 is the separated windings execution & the successor of the 1131.

Blue22

With the Blue22 the time for installation and style change is significantly reduced. Weavers no longer have to adjust each prewinder finger separately, as there is a single adjustment for all fingers together. This ensures that all fingers are automatically positioned in a perfect circular shape, avoiding drops in performance caused by a non-symmetrical shape after several style changes.

Blue22 EasySet & Blue11 EasySet

EasySet allows the length of the filling to be adjusted fully electronically from the machine terminal without stopping the machine. This provides users with the flexibility of adjusting waste length during production.

Advantages

- Cost benefit: Reduced installation and style change time
- Improved control of waste length for all channels, as such reducing cost
- Symmetrical circular shape of the fingers on the prewinder improves stability & quality
- EasySet function: Everything can be set up from the machine terminal & settings can be transferred to other machines

Application

Picanol advises Blue11 EasySet in specific applications such as sheeting with 4-pick insertion (or more), wool, flax, mattress ticking, multi-filament.

PATENTED

Blue22 (EasySet) AVAILABLE ON :

- OMNI*plus* Summum
- TERRY*plus* Summum
- OmniPlus-*i*
- TerryPlus-*i*
- OmniPlus-*i* Connect
- OmniPlus-*i* TC Connect
- TerryPlus-*i* Connect

Blue11 EasySet AVAILABLE ON :

- OmniPlus-*i*
- TerryPlus-*i*
- OmniPlus-*i* Connect
- OmniPlus-*i* TC Connect
- TerryPlus-*i* Connect

Picanol Original Quality Parts offers a wide range of products and solutions to increase the flexibility, performance and profitability of your installed weaving machines. We provide state-of-the-art technology adapted for your weaving machines, helping you to realize maximum weaving results and value of the machine investment.
